

Columbia Fire Department

Fire Safety Education Programs

Learn Fire Safety!

Grades K-8

Easily integrate fire and life safety messages in the classroom by ordering a free, activity workbook and / or check out our action packed safety suitcase.

Solidify safety knowledge and behaviors with a fire station tour or firefighter school visit. Students will learn first hand how firefighters work to keep our city safe. You may request a local fire station tour or request a firefighter visit at your school.

Learn Fire Science!

Grades 6-8

The Columbia Fire Department presents a curriculum challenging student knowledge of fire science by comparing videos of real fire with excerpts of fire portrayed in popular media. Based on what real fire is like students develop their own fire escape plan, learn ways to prevent fire at home and how to make fire safe choices. Choose one or more courses for your classroom.

Curriculum aligns with Columbia
Public Schools Health and Fitness Program

Juvenile Fire Setters Program

Whenever a fire occurs at school, no matter how small, the Columbia Fire Department must be notified. If a student is involved we recommend a referral to the Juvenile Fire Setters Program. This program educates children and provides families with resources and tools to stay safe. A referral can be made by calling the Fire Marshal's Division
